

Daily Report
R/V Ocean Veritas
May 26, 2010
Eric Dubinsky and Olivia Mason

Arrived in Port Fourchon overnight. In Port Fourchon we received all remaining supplies were delivered.

In port we visited the Brooks McCall to inspect the layout of their lab and office space.

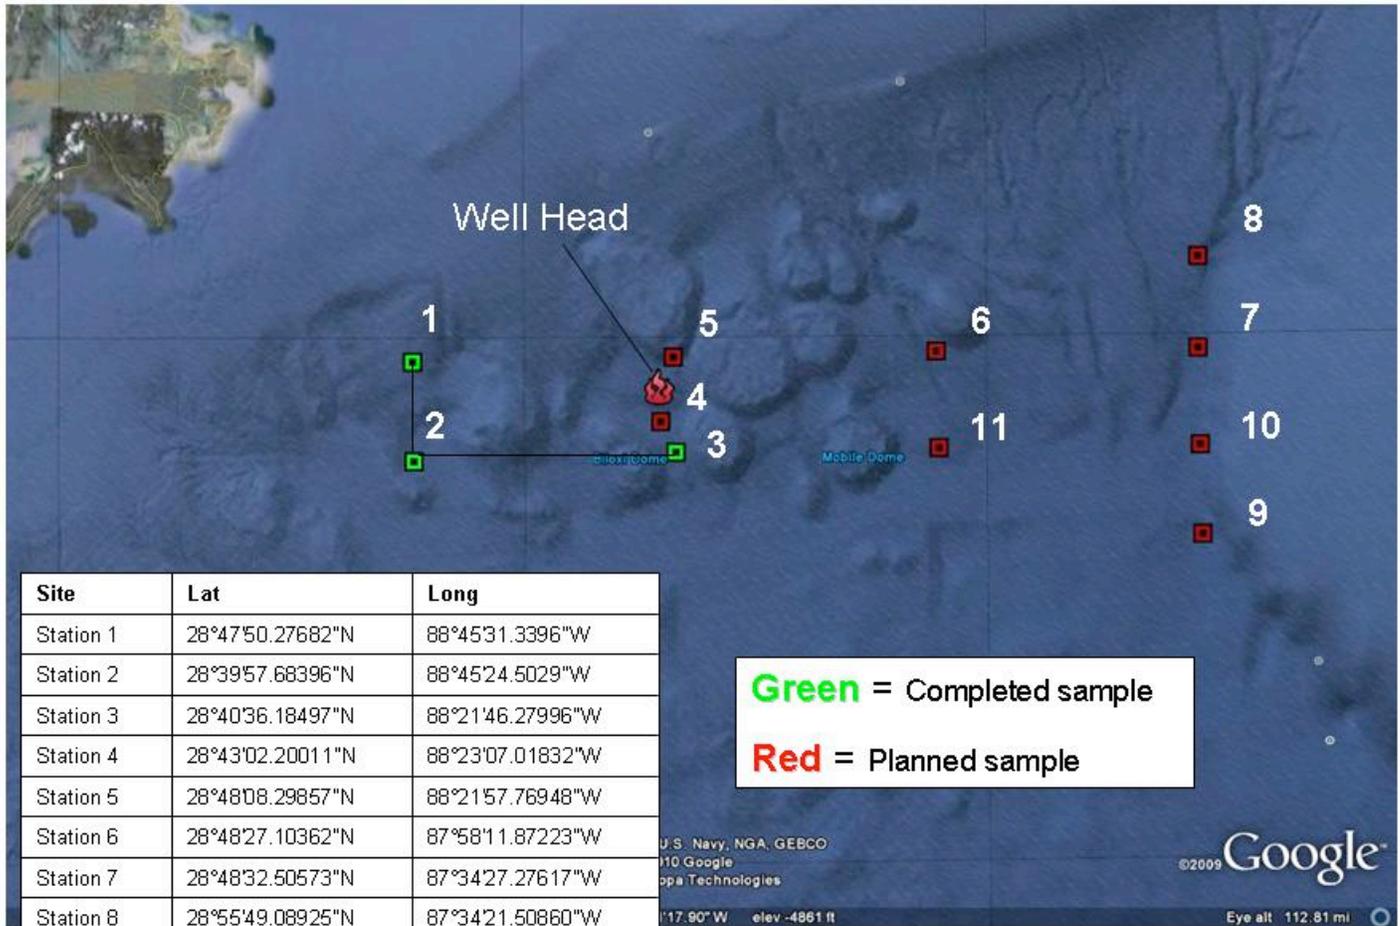

We held a safety meeting and discussed anticipated hazards we might encounter during sample processing and appropriate controls to consider as we planned our sample handling strategy.

We were given table space for our filtering equipment in the science team room. We secured a smaller table for handling bottled samples and computer work. We moved most of our equipment into the main science room and spent the rest of our evening setting up the lab, testing equipment and troubleshooting.

The science team held a brief meeting. Discussion of CTD deployment and retrieval, back deck procedures and safety during sampling. Cruise objectives and sampling

site locations were not discussed at the meeting. A sampling map (see attached) was made available later by the lead scientist and we departed for the first sampling site (V01) at 18:00.

Site	Lat	Long
Station 1	28°47'50.27682"N	88°45'31.3396"W
Station 2	28°39'57.68396"N	88°45'24.5029"W
Station 3	28°40'36.18497"N	88°21'46.27996"W
Station 4	28°43'02.20011"N	88°23'07.01832"W
Station 5	28°48'08.29857"N	88°21'57.76948"W
Station 6	28°48'27.10362"N	87°58'11.87223"W
Station 7	28°48'32.50573"N	87°34'27.27617"W
Station 8	28°55'49.08925"N	87°34'21.50860"W
Station 9	28°33'45.70607"N	87°34'14.12651"W
Station 10	28°40'51.53781"N	87°34'21.34712"W
